

Annisa Puspitasari

Babakan ciparay, Bandung, Indonesia | [+62 89508320163](tel:+6289508320163)

Education

STMIK “Amik” Bandung

Bachelor of Informatics Engineering

Kebonwaru, Bandung

September 2021 - September 2025

Relevant Coursework: Algorithm & Programming, Data Structure, Software Engineering, Computer Networks, Web Programming, Design and Web Services, Functional Programming, Database Implementation SQL & NoSQL, Practical Operating System, Big Data Analytics, Distributed Computing, Natural Language Processing, Image Processing, IOT Concept & Microcontroller, Adhoc Networks, Data Science, Electronic Circuit, Augmented Reality, Design and Implementation of System, Data Model Abstraction, Data Analysis, System Integration, System Testing, Platform Preparation and Deployment, Project Management, Digital Asset Management, Discrete Structure, Object Oriented Programming, Database Fundamental, Artificial Intelligence, API, Mobile Programming, Network Security, Device Protocol, Container System.

SMKN 4 Bandung

Associate of Software Engineering

Turangga, Bandung

September 2018 - Juni 2021

Relevant Coursework: Digital Simulation and Communication, Computer Systems, Computers and Networks, Programming, Graphic Design, Software Modeling, Databases, Object-Oriented Programming, Web Programming.

Experience

PT. Ramat Loka Teknologi

Web Designer

Batununggal, Bandung

Juni 2021 - Juni 2025

- Developed high-fidelity UI designs by translating user flows for multiple client projects, including Sucre, Temasline, Sahrul Gunawan, Juarta, and Rediprint, using Figma
- Refactored and updated legacy UI of Investmentpal by implementing new frontend designs from Figma. Built responsive layouts for tablet and mobile while preserving the existing architecture using HAML, CSS3, and JavaScript.

PT. Sagara Asia Teknologi

Frontend Developer

Dayeuhkolot, Bandung

September 2020 - November 2020

Assisted in slicing several screens for the InvestX project during my internship at Sagara, converting Figma designs into React.js components using Material UI and SASS.

Skills

I am rebuilding new role

Currently focus on learning fullstack development and to be honest, for right now you can only trust me to work on designs using Figma or development in HTML, CSS, JS and some Python desktop programming :”)

Portfolio

February 2026

annisaps.vercel.app

Designed, engineered, and deployed this portfolio website from scratch using HTML and CSS. An editorial-style UI that merges elegant typography, soft visuals, and a magazine-inspired layout.
