Education

STMIK AMIKBANDUNG

Bachelor of Informatics Engineering

Kiaracondong, Bandung

September 2021 – September 2025

Relevant Coursework: Data Structures, Intro to Algorithms, Foundations of Computer Science, Software Design and Documentation, Principles of Software, Database Systems, Intro to Artificial Intelligence, Network Programming, Operating Systems, Programming Languages, Computer Organization.

SMKN 4 BANDUNG

Software Engineering

Turangga, Bandung

September 2018 – Juni 2021

Experiences

Doterb Solution

Web Designer

Batununggal, Bandung

Juni 2021 – Juni 2025

- Developed high-fidelity UI designs by translating user flows for multiple client projects, including Sucre, Temasline, Sahrul Gunawan, Juarta, and Rediprint, using Figma
- Refactored and updated legacy UI of Investmentpal by implementing new frontend designs from Figma. Built responsive layouts for tablet and mobile while preserving the existing architecture using HAML, CSS3, and JavaScript.

Sagara Technology

Frontend Developer

Dayeuhkolot, Bandung

September 2020 – November 2020

Assisted in slicing several screens for the InvestX project during my internship at Sagara, converting Figma designs into React.js components using Material UI and SASS.

Project

Editorial-style Portfolio Website

Creator and Sole Developer

annisaps.vercel.app

February 2026

Designed, engineered, and deployed this portfolio website from scratch using HTML and CSS. An editorial-style experience that merges elegant typography, soft visuals, and a magazine-inspired layout.

Skills

Language Proficiency

Python • JavaScript • HTML5 • CSS3

Web Development & Frameworks

React.js • Node • Express • Jest
